

SMART FEATURES SO SMART, THEY'RE DOWNRIGHT GENIUS

We're always working to make our products even better for plumbers and their customers. And some of our latest innovative features represent huge leaps forward in water heating technology.

LeakGuard™ Auto Water Shut-off Valve

Automatic home and valuables protection. In the unlikely event of a leak, this all-inclusive leak prevention system protects the home or business by shutting off incoming water and limiting the amount of water that escapes from the tank. A regular water heater leak can release 40, 50 gallons of water or much, much more if the water isn't shut off quickly. LeakGuard limits the leak to as little as 20 ounces (depending upon the Rheem water heater it's featured on)¹.

Hot Water Availability

No more cold shower shock. The hot water availability indicator in the EcoNet App works with Rheem Gladiator™ and ProTerra™ Hybrid Electric Water Heaters to let homeowners know how much hot water is available before they jump in the shower.

To take advantage of these advanced features, install a Rheem Gladiator™ or ProTerra™ Hybrid Electric Water Heater. Commercial customers can enjoy the protection of LeakGuard with a Triton® High Efficiency Gas Water Heater.

¹Water leaks from the heater only, as tested across scenarios including a minimum of 5.5mL/min volume leak rate, using most common installation scenarios.

The new degree of comfort.®
