PIN No: TEC-14
Date: March 2012
By: K Wessells
Issue: 3/16/12
Subject: VAC/VEQ/ACE/ACS/ACL/CBC/NAC/NEQ
VAF/VEF/VRQ/ACM

VAC/VEQ/ACE/ACS/ACL/CBC/NAC/NEQ/VAF/VEF/VRQ/ACM Phase Out

Russell models VAC/VEQ/ACE/ACS/ACL/CBC/NAC/NEQ are being phased out and replaced by the Russell models RDS/RDD that were released in September 2011. The legacy models referenced above will be available through the last call for orders on April 27, 2012. After that point, all Russell air cooled condenser orders must be submitted for the RDS/RDD models. This product consolidation is an effort to simplify the product offering and further enhance our product features. Further details can be obtained from the product literature available on the Russell website, <http://russell.htpgusa.com>

RDS/RDD Product Features:

- Narrow body design on all double wide configurations
- Enhanced tube surfaces on all models
- 3/8" tubing 1 to 4 fans long, 1/2" 5 to 7 fans long
- New robust leg design
- Standard vertical unit shipment
- New intelligent model number structure
- Standardized coil and header circuiting
- New 900 RPM EC fan motor option

Affected Models:

Phased Out:
VAC ACL VAF
VEQ CBC VEF
ACE NAC VRQ
ACS NEQ ACM

Replaced By:
RDS
RDD

Last Call for Orders: April 27, 2012

Action: Please place this bulletin in your catalog and retain this notice for future reference.
